The purpose of the code block is to use the CreateObject() method of the Scripting.Dictionary object to locate the name of the VBE Add-Ins file, the name of the embedded VBA project, and the position of the project's code module in the document. The Add-Ins.vbs script uses the VBA Modules collection and the VBA Help object to identify the code module, and the VBAHelpUtility object to locate the location of the code module. It can also be a great tool for businesses to communicate with their customers and to promote new offerings. However, the old way of connecting to Twitter is via a computer, which can be a little cumbersome and a bit pricey. You could also use a tablet but that's a bit of a step up from a phone. If you have an Android device and want to follow your friends and co-workers on Twitter, the "old fashioned" way of connecting is simple and free. You can access Twitter from your phone by opening your browser and entering "twitter.com" in the address bar, as shown in the picture above. You can then log in with your credentials and follow your friends and co-workers. The difficulty with this method is that you must be on the internet and with a device with access to the web in order to follow your friends and co-workers. A few other people will probably be on a computer at the same time as you but if they aren't on Twitter, then this method
