Busting the myth of “drive and pray” with video conferencing software. Just a few years ago, the idea of an intuitive video conferencing software tool that allows users to quickly and easily collaborate with employees or customers across the country or around the world would have seemed unlikely. With this release, all AutoCAD users are now able to open drawings from other applications and save the new drawings as AutoCAD drawings. These drawings are now on the same level as those drawn in AutoCAD. Previously, CAD users only had to open drawings saved in other applications into AutoCAD.
