(referred to as a "IGFET", hereinafter) formed on a single substrate. In recent years, semiconductor integrated circuits have been increasingly integrated so as to increase the device integration density. However, the devices have been reduced in size according to such a trend so that the mobility of the electron has decreased. To compensate for such a decrease in mobility, an improvement in the gate insulation layer is becoming a necessity, as described in "Material Research Society Symposium Proceedings", Vol. 240, pp. 149-158 and pp. 179-188, 1989.Q: Fiddler intercept outgoing requests with Mono I'm trying to get Fiddler to intercept outgoing web
