Category: Simple as that Rating: ExpertGig Reviews Finding the best phone signal is tough, and getting one with the best possible reception at a price you can really afford is even harder. This is where ExpertGig comes in: we have reviewed all the best mobile phones on the market and have selected, in our opinion, the 10 best, all of which feature a 4G LTE or 4G/3G network option. While you may have to sign a contract, there are no upfront costs to buying the phone either. ExpertGig's top handset recommendations The phones listed in the table below are great value for money and are good across the board. Some of them are handsets with solid 4G LTE network coverage, while others are 3G/4G capable handsets that meet your needs if you only use a mobile phone in the UK to access the internet, check email and make phone calls. All of them are fully compatible with any GSM network operator and you'll be able to make and receive calls and access the internet via WAP and Wi-Fi. All have plenty of memory (5GB and above) that will keep you happy and aren't very expensive. Of course, 4G network coverage isn't as widespread as 3G, but it is great to have a phone with a strong 3G signal in places such as airports, trains and underground. A phone on 3G can still be your trusted mobile for accessing the web, texting and making phone calls, and there are plenty of cheap handsets offering this. You can check out all of our top recommendations for 4G handsets below and make your decision. If you have any questions, simply use the comments section to let us know. Best Mobile Phone Plans Mobile phone networks have come a long way in recent times, with many thanks to newer technology and the ever-increasing uptake of smartphone use. If you don't already have a mobile phone plan, you're probably probably asking "Why should I pay for it?" This can be a valid question, especially since you don't really need your phone to make or receive phone calls, but that doesn't mean you have to pass up on value for money. If you're planning to switch mobile networks or just want to see what our top pick would cost you, you'll need to make
