Copper Full Version Free

Copper is an intuitive, convenient and easy-to-use point of sale software utility that saves time and allows you to focus on your store's daily activities. With this software, you can add items, prices, taxes, discounts, coupons, etc. Highlights: Record your sales and salespeople. • Add products, pricing and discounts, or create a new product. • Edit specific details for each product. • Review sales details. • Set discounts and/or prices. • Allow your salespeople to set the minimum and/or maximum quantity of a product. • Create a product's new "unique code" (or EAN, UPC or use other codes) and generate barcodes (and preview them). • Save the product's unique code, price, discounts and taxes. • Print out sales receipts. • Backup or restore data. • Create reports or e-mails. • Edit coupon settings. Copper Screen Shots: Reviews Write Your Review 1. How do you rate this product? 2. Write a headline for your review here: 3. Write your review below: We promise to never spam you, and just use your email address to identify you as a valid customer. Enter your name: (optional) Enter the code below: Default Quality is a really good product. As a manager it can be a little difficult finding a good web program. This program caught my eye, as it's free. I love the ability to add products. To create a coupon, I hit the save button, and the ability to print coupons. My favorite feature of this product is the ability to create a coupon for a product, then create a receipt. It's a great feature. I really like this program. Easy to use. It's a great program and the only glitch I found was the help file was very difficult to download and use. So if you decide to download it or use the help file, download it with something like Internet download manager. Didn't work. Bought the program, but only paid for it in part, went back to the store and purchased the rest, ran the trial and the program fails and says it has expired, won't let me proceed, I've tried everything, software, internet browser, etc. Don't know what to do with it. The software doesn't work. I downloaded

What's New In?

Product SelectionThe most complete and easy-to-use cash register software available. Featuring an intuitive, seamless user interface and a myriad of useful features. Store manager information, including Administrator (admin) and Sales Person (sales) privileges, is also included. No need to run the risk of losing your data each time you have to reinstall the software. All of your information is backed up. Also, Product Administration allows you to add/delete up to 50 products. You can categorize products as regular or exclusive items. You can make multiple currencies. You can add different taxes, discounts and coupon codes on a per-product basis. Your Cash Register can also print receipts and reminder notices. Barcode Scanning and Touch Screen Compatibility: Barcode scanner software works with the same barcode scanners that store managers are familiar with. Simply scan the barcode of any product, using your barcode scanner and the software will automatically extract the needed information. You can add barcodes to products and maintain their information, change the barcode format and include new data. Moreover, you can delete existing barcodes, and the software will automatically update your store with the latest records. Although the software does not offer touch screen compatibility, it has the ability to recognize the symbols of most touch screen devices, such as the Palm series, and print receipts accordingly. Backing Up and Restoring Your Data: All of your data is backed up automatically and never lost. The settings can be restored at any time, you can backup and restore all data or your specific user settings. Your Salesperson and Administrator data is also backed up separately. Full backup and restore ability allows you to quickly and easily recover from any mistakes. PDF Support: All of the report and summary data stored in the database are available in a PDF format. You can easily print it or e-mail it. Product Catalog: The catalog provides a multilevel form of sales promotion. With your product catalog, you can sell product at a lower price, extend the

expiration date of a coupon, prevent the use of one coupon code to another and make other more customized options. You can add multiple products to your database, including the code, description, price, discount and tax. In case of mistakes, people can refund products. Easy of Data Updates: Product price, discount, tax and coupon details are regularly updated in real-time. Ass

System Requirements:

OS: Windows Vista/7/8/8.1/10 (32-bit and 64-bit) Processor: Intel Core 2 Duo 2.4 GHz or equivalent Memory: 3GB RAM Storage: 300MB free hard drive space Graphics: OpenGL 2.0 compliant video card (1024x768) DirectX: Version 9.0 Additional Notes: Games may have different requirements based on how they are being played, i.e. on console versus computer. Some games require a constant connection to the Internet
